

## Companion Planting Charts

Companion planting means that certain vegetables, herbs, and flowers like to grow together. They often help each other grow better, yield more or taste better. Some plants can also repel pests or attract pollinators. These plants can be planted in squares next to each other or even in the same square if there is enough space.

Vegetable	Compatible With	NOT Compatible With
Beans	Cabbage family, carrot, corn, cucumber, eggplant, peas, potato, Swiss chard, marigold, nasturtium, oregano	Chive, garlic, leek, onion
